Linking the AV systems in AG35a and AG35b

1. Start the AV systems in both rooms, and wait until the main menu is displayed on both touchpanels as shown below.

2. In AG35a, press the blue LINK ROOMS button on the touchpanel.

The touchpanel in AG35b will display a red button indicating that the rooms are now linked.

3. Select the source you wish to display from the touchpanel in AG35a. The AV system in AG35b will follow until the rooms are unlinked.

Unlinking the systems

The systems can be unlinked from the master (AG35a) or the slave (AG35b) touchpanels by pressing the red UNLINK ROOMS button. Note: Button text varies slightly between rooms as illustrated below.

Shutting down the AV systems will automatically unlink the rooms.
